## **Solaris vs Red Hat**

Solaris vs Red Hat

Diese beiden Stellen erscheinen mir hierbei besonders interessant:

Now we are not talking about a micro benchmark here but a system level capacity. This was on a 12 way E4800 (SPARC platform). Basically, they loaded Solaris 10 on the same H/W and were able to do 36% more stock transactions per second.

oder

And you know what, we haven't exactly been sitting around for the past year. Solaris 10 update will improve performance over S10 FCS by another 20-25% on networking workloads.
