ZDnet about Niagara 2

ZDNet reports about Niagara 2 in Sun: Niagara sequel more power-efficient. Good article but one heavy mistake: 10 Gigabit per second. Not 10 Megabit per second. We have 2006

Posted by Joerg Moellenkamp in Oracle at 12:50

leider gibt Herr Fowler zu, dass der hohe Stromverbrauch der FB-DIMMs die Energiebilanz ziemlich runterzieht... also hoffen wir, dass die Niagara3 (Rock ist Niagara4?) wieder vernuenftigen Speicher (DDR3) nutzen wird...

I see the same problem. But you have to see the power consumption in relation to the performance. BTW: Rock is a completely different development ...
