Apology for duplicated posting

A message for the peoples, who reach my blog via blogs.sun.com: I have no idea, why my blog entries are duplicated. I've checked my feed that is used for the syndication. No duplicates. The automated syndication to my blog at blogs.sun.com/c0t0d0s0 is deactivated. I even gave blogs.sun.com an seldom used url for the feed to enable some tracking of the problem. At the moment a tcpdump sniffs for the accesses from b.s.c. So i really apologize for the duplicated entries, but i can't change anything right now. I have to admit, that i have no clue, what the heck the problem is.

Hi Joerg. I just deleted your feed from the site aggregator. Let's see what happens with your next post. I can add it back in once we determine the cause of the dupes. Thanks! Linda

Hello Linda,

i've reactivated my blog sync plugin as long you search for the problem. I apologize for any inconvenience.

Regards
Joerg
