Power6 late?

Ashlee Vance points to an IBM slide deck and the arrival date of "to come" for the Power6. Recently, however, silicon speculators have grumbled about more delays facing Power6. IBM has pledged to pump the product's clock past 5GHz, and insiders suspect the company is struggling to get solid, high clock rate yields. In addition, more gossip mavens claim that IBM's AIX 5.4 delays have hampered the Power6 roll out. "To come" is a really good timeline ... you can't miss your deadlines
