SunCEC2007 Day 2: Jonathans Keynote

Jonathans has closed his presentation right now. Really good .. as usual ...

Some short takeaways from the keynote:

He thanked for 1.2 \$ billion more profitability
He is really pissed about patent trolling
the momentum around our os is undeniable
"we develop for customers who see IT as a competitive weapon"
There is Redshift in every company
"No fear. (Show courage)" when going after opportunities ...
