### **SunCEC2007: Green Backpacks**

These green backpacks at with the embroidered "CEC 2007" were really useful ... it was really easy to tell Sunnies from other peoples around in Vegas. I assume veteran CEC visitors will use this backbacks in 10 years to distinguish themself vom the newbies

BTW: I saw many 2006 backbacks ...

Posted by Joerg Moellenkamp in English, suncec2007 at 17:06

The bags won't be in use for 10 years, I left my now worn and useless 2005 bag in Las Vegas. The 2007 is better, but the old one had reached its end of life. They're not built by engineers.

The trick would be: Use it only for such large engineer gatherings. Joke aside: The 2006 bag was the best so far, but i had to repair it twice so far ...
