### **UltraSPARC T2+ and the Sparc Enterprise T5240**

Today Sun and Fujitsu announced the the first new multiproc Victoria Falls systems: Sun Microsystems And Fujitsu Expand SPARC Enterprise Server Line With New UltraSPARC T2 Plus Processor-Based Systems. The benchmark results for this new system are really good: The SPARC Enterprise T5240 server supported 4,170 SAP SD Benchmark users - a result more than double the 2,035 SAP SD Benchmark users achieved by the IBM p570 system with two POWER6 processors. or The dual-socket SPARC Enterprise T5240 server running the Solaris 10 OS excels on the Lotus iNotes email benchmark with 65,000 users -- the highest ever number of supported users..

The announcement already resulted in a huge amount of blog articles. Some really interesting entries so far:

- Scaling Solaris on Large CMT Systems
- Fast! Java on UltraSPARC T2 Plus
- T5240 PCI-E I/O Performance
- 10 Gigabit Ethernet on UltraSPARC T2 Plus
