VomitOne

Alec Muffet coined this phrase for the final day of the JavaOne. Somehow the Norovirus was found at the JavaOne. The symptoms of norovirus illness are nausea, vomiting, diarrhea, and some stomach cramping. The Valleywag reports about this, too. In earlier times, it was Montezuma's revenge, the beer too much or unfamiliar meals. Today it has to be an virus ...

BTW: I find stomach problems in the US quite normal. I don't like this chlorinated water, and my stomach hates it. This is something i like in Germany. Pure water out of the tap without the feeling of being in a swimming pool.
