Sun Storage 7410 reviewed

IT Pro reviewed the Sun Storage 7410 system in an article published on April 15th. The system got 5 of 6 stars and the article reviewed the system in a positive light.

Furthermore the articles talks about one of the most important points behind the Sun Storage 7000 series: There is no long price list with add-on features even for really basic stuff. All features are included in the price of the system. This makes really a large difference.
