Sun Ray Server 5.0 Early Access

The ThinGuy reports about it in his Twitter feed: There is a new version of the SunRay Server Software in the early access phase: Sun Ray Software 5 and Sun Ray Soft Client 1.0 Early Access 1 (EA1). There is especially one interesting new feature: A Sun Ray Soft Client for Windows, thus you can use a desktop as a Sun Ray for the time of the migration towards a pure Sun Ray solution.
