### **Interesting device**

Sometimes you stumble over interesting upcoming products already documented in docs.sun.com: Click on Storage, then at the "Browse Product Documentation" at Hardware (if it's not already opened), then click on Disk storage. Now open the Solid State Storage part of the tree. And hopefully you will find the documentation of a really interesting device.

Shiny.

Fällt Dir spontan ein usecase ein, wenn man das Ding nicht an einen Thumper klemmen kann?

Waiting for Benchmarks to see how many I/O that thing can take  
Anonymous on Sep 2 2009, 20:44

Just in three word: Really f\*cking fast.  
Anonymous on Sep 2 2009, 21:17

Cool - will Oracle put this in the Exadata solution instead of the HP DL180? How much faster would their DB Machine be?
