A lot of time

Damned, now i have a lot of time ... because of a mismatch between the real number of residual steps and the perceived number of residual steps on a stairway. Now i'm a proud owner of a fractured ankle join (the doc is not totally sure if it's a ankle ligament injury as well, next x-ray middle of next week will show it). Can't need that right now ...

Gute Besserung! Was ist passiert? Ein Winter ohne Schnee und Eis und du knackst dir das Gelenk an. Alles, alles Gute und hoffentlich ist es nicht allzu wild.

Has it been in your home?

I haven't liked them at home. They are dangerous. If it has been the cause, an argument with my wife for buy a house with only one floor.

I like this benchmark more:

<http://dl.wolfpond.org/Pg-benchmarks.pdf>

OpenIndiana 151a vs. Scientific Linux 6.1 (and a bunch of *BSDs) running PostgresQL.
