Registration for Solaris Tech Day on January 13th 2015 in Cologne online

The registration for the "Oracle Solaris TechDay: Sharing Experiences, Engineering Insights and Outlook"-Event is now online. So you can now register for the event. I think it's really interesting in order to learn about the new stuff in Solaris and where the operating environment is heading to.

PS: The headline initially stated "February 13th". This is incorrect. It's January 13th.
