Computerworld: "Oracle preps 'Sonoma' chip for low-priced Sparc servers"

Interesting read at ComputerworldOracle is looking to expand the market for its Sparc-based servers with a new, low-cost processor dubbed Sonoma that its engineers will discuss publically for the first time later this month.Later this month refers to the Hotchips conference. There is a presentation called "Oracle's Sonoma Processor: Advanced low-cost SPARC processor for enterprise workloads" in the agenda.
